### PROJECT DESCRIPTION:

This small cottage-style house has been completely transformed. All of the plaster was removed from the inside and a new foundation was installed under the house with a new concrete floor.

On the first floor, an addition was added to the South side of the house to expand the kitchen area from a galley kitchen to a full walk-in kitchen with island and pantry. On the west side an addition made way for an entry way with closet, bench seating and first floor laundry. Finally, a northern addition was added to create a front entry with closet off of the dining area and a larger living room.

On the second floor, the south wall was raised to 7' to access all of the unused floor space that was available. A second floor bathroom was also added.

- Maintenance-free vinyl siding
- Painted walls with white trim and doors
